Skills :

Programming Languages: Python (Intermediate), SQL (MySQL)

Web Technologies: HTML, CSS

Data Tools: MS Excel (Data Analysis & Visualization)

Database Management: Database Design, Query Writing, Data Handling

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork

Training Experience:

📄 **Excel Certification** – *Younity*

Learned data organization, formulas, pivot tables, charts, and data visualization.

📄 **Data Analytics (Ongoing)** – *Ducat*

Learning Python, SQL, Excel, Power Bi and visualization tools for real-world applications.

Language:

English , Hindi

Project :

Vrinda Store Data Analysis (Excel Project)

- Analyzed store sales and customer data using Excel to identify monthly trends, top-selling products, and customer demographics.
- Cleaned and organized raw data using Excel functions, filters, and conditional formatting.
- Created PivotTables and PivotCharts to summarize performance and highlight key insights.
- Designed an interactive dashboard with slicers to support data-driven decision-making.

Sales Performance Dashboard (Power BI Project)

- Built an interactive Power BI dashboard to analyze sales, revenue, and customer behavior across multiple regions.
- Cleaned and transformed raw data using Power Query, merging datasets and applying DAX formulas for calculated columns/measures.
- Created advanced visualizations (bar charts, line charts, KPIs, map visuals, filters) to track monthly performance and product trends.
- Enabled drill-down insights for management to identify top customers, high-performing categories, and sales growth opportunities.

Responsive Website Design (HTML & CSS Project)

- Designed and developed a fully responsive multi-page website using HTML5 and CSS3.
- Implemented clean UI layouts using Flexbox/Grid, custom styling, and modern design principles.
- Added interactive elements, navigation menus, cards, buttons, and hover effects for a polished user experience.
- Optimized the design for mobile, tablet, and desktop viewing.
